Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-18 and 34-42, drawn to "A method of converting a source pixel data of a first format to a second format", classified in class 345, subclass 603.

II. Claims 19-24, drawn to "A method of determining a geometric center of each emitter of each three-color pixel element", classified in class 345, subclass 613.

III. Claims 25-28, drawn to "A method of limiting filter kernel divisors in a filter kernel to a value designed to simplify hardware implementations", classified in class 708, subclass 308.

IV. Claims 29-33, drawn to "A method of operating spatial sampling filters", classified in class 382, subclass 260.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, III and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as method for format conversion. Invention II has separate utility such as method for determining a geometric center of each emitter of each three-color pixel element. Invention III has separate utility such as method for calculating areas for filter coefficients using floating point arithmetic. Invention IV has separate utility such as method for turning on a first set of spatial sampling filters for subpixel rendered areas.

See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction

Art Unit: 2675

for examination purposes as indicated is proper. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
